Summary

Unity Developer with over 2 years of hands-on experience in developing interactive 3D, VR, AR, and MR applications. Experienced in building educational games, immersive simulations, and enterprise training platforms using Unity3D and C#. Strong background in gameplay mechanics, UI systems, performance optimization, and XR SDK integration. Proven ability to collaborate in small to medium-sized teams and deliver real-world projects across education, training, and simulation domains.

Skills

- **Programming:** C#, C++ (OOP, Data Structures & Algorithms).
- **Engine:** Unity (3D, VR/AR/MR, XR SDKs, AR Foundations, AR SDKs (Vuforia, ARKit, ARCore)…), Unreal Engine 5 (Blueprints, C++ – basic, in progress).
- **Source Code Management:** Git (GitHub, GitLab), Plastic SCM,...
- **Languages:** English (TOEFL ITP 480), Russian (basic).
- **Hardware:** Meta Quest 2, Quest 3, and Quest 3S, HTC Vive and Vive Focus 3, Microsoft Hololens 2.

Experience

Work Experience:

- **Unity Developer**
  Freelance / On-site / Personal Projects
- **Duration:** More than 2 years.
  - Utilized Unity and C# to develop and deploy multiple real-world projects, focusing on gameplay mechanics, UI implementation, and performance optimization.
  - Built interactive game features such as player controls, animations, and collision systems.
  - Integrated third-party tools and plugins to enhance functionality.
  - Collaborated with designers and testers using Git for version control and project management.

Edmicro Education Co., Ltd. *(On-site)* — *April 2024 – June 2025*

VR Software Engineer

- Developed **3+ VR and interactive 3D educational applications** for primary and high school students, serving **hundreds of learners** across multiple subjects.
- Implemented interactive systems allowing users to explore 3D models related to Math, Physics, Chemistry, Biology, and environmental science concepts.
- Integrated VR SDKs and handled user interactions within immersive learning environments.
- Optimized performance and ensured stability across educational VR applications.
- Collaborated with **3–4 member cross-functional teams**, working closely with designers and educators to deliver production-ready VR applications.

Digital Unicorn *(Freelance)* — *February 2025 – May 2025*

VR Software Engineer

- Contributed to the development of an **AI-powered VR training platform** as part of a **15-member team**, supporting enterprise onboarding and internal training workflows..
- Developed interactive VR environments and user interaction systems using Unity3D and C#.
- Integrated **Speech-to-Text and Text-to-Speech features** to enable hands-free interaction and AI assistant guidance within VR training scenarios..
- Focused on usability, immersion, and performance optimization to ensure smooth VR training experiences.

Plus Studio *(On-site)* *June 2025 – October 2025*

XR/ MR Software Engineer

- Developed interactive educational and simulation projects using Unity3D and C# for VR/MR platforms.
- Built **8+ interactive mini-games** (fruit slicing, feeding, milking, quizzes, etc.) to improve engagement, reflexes, and logical thinking for young users..
- Implemented XR features using Meta XR SDKs and MR SDKs to support immersive mixed reality experiences.
- Contributed to a historical battlefield simulation project set in Vietnam (1945), combining historical research with immersive simulation technology for educational purposes.

VRTech JSC *(On-site)* *November 2025 – Present*

- Developed and published **multiple VR games on Meta Horizon Store**, optimized for standalone Meta Quest devices with a focus on performance stability and user comfort.
- Designed and implemented interactive VR gameplay systems, including player movement, object interaction, physics-based mechanics, and UI in VR environments.
- Developed **VR simulation applications for rescue, disaster response, and firefighting training**, enabling trainees to practice emergency procedures in **high-risk scenarios without real-world danger**.
- Optimized VR applications for standalone hardware, focusing on frame rate stability, memory usage, and user comfort.

Knowledge & Activities

Posts and Telecommunications Institute of Technology *September 2023 – Present*

- Junior student at school.
- Achievements: Top scores in programming subjects (C, C++, DSA, OOP,…)
- Activities: Participated in algorithmic competitions (ICPC PTIT, Provincial IT Olympiad, Young Informatics,…)
